# Why Publish in the Physical Review Journals

## OPEN ACCESS OPTIONS FOR ALL AUTHORS

The fully open access *Physical Review* journals make all articles immediately free to read online under a CC-BY license upon payment of an article publication charge (APC). This maximizes readership and citations, and thus visibility and impact, for researchers and their work.

The hybrid journals in the *Physical Review* family include some of the most-cited journals in the world. These offer authors a gold open access option, which makes the article version of record immediately free to read online under a CC-BY license upon the payment of an APC.

For authors without funding for APCs, the hybrid journals also allow self-archiving of the accepted manuscript in non-commercial repositories, which meets the requirements of most funders' and institutions' green open access policies. Several of these journals are participants in SCOAP3 and publish high-energy physics research open access under a CC-BY license at no cost to authors.

## BY SCIENTISTS, FOR SCIENTISTS

All *Physical Review* journals are shaped by scientists to serve the research community. This commitment ensures that the journals' mission and standards prioritize the needs of researchers and authors.

## HIGH VISIBILITY AND IMPACT

Authors achieve high visibility and broad dissemination of their work by publishing in the *Physical Review* journals. Editors bring attention to outstanding research and convey its importance through a number of features.
